WHAT JERRY SAYS: "I've been asked why I am so interested in space and I still give the same answer that I gave back in the 60s - because it is **unlike anything that has ever happened before in the entire history of mankind**. I feel very lucky to have been around at the time that humans began the exploration of space and I regard myself as privileged to have been able to watch - live - as men from Earth walked for the first time on the surface of another world."

AUTHOR AVAILABILITY
